CIVIL AND ENVIRONMENTAL PROFESSIONAL CONSULTING

WE ARE ONE OF THE FIRST AND LONGEST-TENURED ENVIRONMENTAL ENGINEERING FIRMS IN INDIANA. WE CURRENTLY HAVE OFFICES IN CARMEL AND FORT WAYNE, INDIANA.

HISTORY AND TRADITION

Lougheed Engineering is a three generation, family-owned and operated professional engineering consultancy with over 40 years continuous service. Pioneers in our field, we are one of the first and longest-tenured environmental engineering firms in Indiana.

We specialize in professional engineering and consulting services for civil design and environmental facilitation projects. Our team of professional engineers have advanced degrees and are state-certified Professional Engineers.

We tackle a wide variety of multi-disciplinary engineering issues for a diverse set of clients providing conscientious and competent engineering services at a competitive value.

Family-owned and Operated Professional Engineering Firm

With our quality-driven commitment to excellence, our entrepreneurial business acumen and our insistence on innovation, we help our clients achieve or exceed their goals. Our technical consulting and engineering services have been sought in thousands of civil, commercial and industrial projects.

Small business owners, property owners, manufacturers, lending institutions, real estate developers and city municipalities are among our clients. We work closely with the Indiana Department of Environmental Management (IDEM).

Working with Lougheed Engineering means you get what our clients have come to know and expect from us. We turn risk into opportunity, solve issues efficiently and safeguard our client's interests.

We look forward to resolving your civil and environmental issues. Email us today at jlougheed@lougheedengineering.com or call us at 317-590-0521.

WE BELIEVE GOOD BUSINESS AND GOOD ENVIRONMENTAL MANAGEMENT GO TOGETHER

ENGINEERING SERVICES

1

Phase I ESA Site Assessments

Extensive experience developing Phase I Environmental Site Assessments (ESAs) prior to the acquisition, sale or divestiture of industrial and commercial property.

2

Phase II Site Investigations

Our Phase II Site Characterization services include site analysis, and soil and groundwater sampling to test for possible contamination.

3

Environmental Remediation

Our experts provide skilled remediation strategy selection and design for Phase III Correction Action. Including completion of "No Further Action" status.

4

Underground Tank Closures

We offer comprehensive underground storage tank (UST) removal and remediation including closure reporting activities.

5

Brownfields Redevelopment

We provide Brownfields Redevelopment grant writing and implementation to help city municipalities revitalize urban areas.

6

Geotechnical Engineering

Our geotechnical engineering services include soil analysis, data evaluation and development of geotechnical criteria for site development.
